Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al in view of Ahn. Suzuki et al discloses the claimed invention except for the pressure reduction conduit extending in a radial direction. Ahn teaches a compressor having a pressure reduction conduit 47 which clearly extends in a radial direction of the rear housing of the compressor. It would be obvious to provide Suzuki et al with a pressure reduction conduit which extends in a radial direction, in view of Ahn, for the purpose of reducing the noise coming from the compressor.
3. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.
